Diesel Technology Description:

The skills needed to analyze malfunctions and repair, rebuild and maintain construction equipment, agriculture equipment, or medium and heavy trucks are emphasized in this program. Students are provided instruction and experience in systems such as diesel engines, fuel injection, onboard computers, transmissions, steering and suspension, and brakes.

Computer Literacy must be demonstrated either by competency exam or by successfully completing a computer literacy course prior to 40 credit hours in diploma and degree credentials.

A student must receive a grade of "C" or better to receive credit for successful completion of courses in the diesel technology curriculum.
